Event Goals

The main goals of this event are to encourage students to engage with real-world technology, to connect with professionals in the field, and to showcase student projects and research. Through workshops, talks, and exhibitions, students will gain practical skills and build connections that help them grow in their academic and professional careers.

Who Can Participate

- All SEU undergraduate students
- Graduate students
- SEU faculty members
- Invited guests from industry

How to Prepare

- Register using the form below
- Receive your confirmation email
- Attend the orientation session
- Join the event on the scheduled date

Event Topics

- Artificial Intelligence
 - Machine Learning
 - Deep Learning
- Cybersecurity
 - Network Security
 - Ethical Hacking
- Cloud Computing
- Web Development
- Data Science and Analytics
- Internet of Things
- UI/UX Design

Event Schedule

The event will be held over three days. Below is the full schedule:

Day 1 focuses on opening sessions, AI workshops, and cybersecurity discussions. Day 2 covers cloud computing and data science, while Day 3 features emerging technology courses, student project exhibitions, and the closing awards ceremony. Please arrive 15 minutes early for each session.

Day	Time	Activity	Location
Day 1 - Saturday	9:00 AM	Opening Ceremony	Main Hall
Day 1 - Saturday	10:30 AM	AI and Machine Learning Workshop	Room 101
Day 1 - Saturday	1:00 PM	Lunch Break	Cafeteria
Day 1 - Saturday	2:00 PM	Cybersecurity Panel Discussion	Main Hall
Day 2 - Sunday	9:00 AM	Cloud Computing Session	Room 202
Day 2 - Sunday	11:00 AM	Student Project Exhibition	Exhibition Hall
Day 2 - Sunday	3:00 PM	Closing and Awards Ceremony	Main Hall
Day 3 - Monday	9:00 AM	Data Science and Analytics Course	Room 203
Day 3 - Monday	11:30 AM	IoT and Smart Campus Workshop	Innovation Lab
Day 3 - Monday	2:00 PM	UI/UX Design and Student Showcase	Exhibition Hall
Day 3 - Monday	4:00 PM	Closing and Awards Ceremony	Main Hall

Dr. Ahmed Al-Mutairi
AI Researcher, KACST

Eng. Sara Al-Harbi
Cybersecurity Expert, STC

Dr. Khalid Bin Nasser
Cloud Architect, Aramco Digital

Prof. Layla Al-Otaibi
Head of CS Department, SEU

For more information about the speakers you can visit the [SEU website](#).

Registration Form

Please fill in all the fields below to register for the event.

Full Name:

Nishat

Student ID:

2023200010113

Email Address:

nishatbhuiyan157@gmail.com

Preferred Attendance Date:

09/07/2001

Which day do you prefer to attend?

☒ Day 1 - Saturday

☐ Day 2 - Sunday

09/07/2001

Which day do you prefer to attend?

☒ Day 1 - Saturday

☐ Day 2 - Sunday

☐ Both Days

☐ Day 3 - Monday

☐ All Three Days

Select the sessions you want to attend:

☒ AI and Machine Learning

☐ Cybersecurity

☐ Cloud Computing

☐ Data Science and Analytics

☐ IoT and Smart Campus

☐ UI/UX Design

Hello, Nishat! Your registration is ready to be confirmed.

Seats are available. There are 25 seats remaining.

INFORMATION)

Testing and Corrections

The website was thoroughly tested to ensure that all major features were working correctly and providing the expected results. Different parts of the website, including the navigation menu, buttons, images, registration form, and overall page layout, were tested in the browser.

During testing, some minor issues related to image paths, CSS styling, and element alignment were identified. These issues were carefully checked and corrected to improve the appearance and functionality of the website. The registration form was also tested with different inputs, and the successful submission message was verified.

After completing the corrections, the website was tested again to ensure that the changes worked properly without affecting other features. Finally, the complete project was uploaded to the GitHub repository, and the GitHub Pages live link was tested successfully.

Overall, the testing and correction process helped ensure that the website was functional, visually consistent, and ready for submission.

Learning Reflection

Through this lab, I gained practical experience in developing a functional and user-friendly website using HTML, CSS, and JavaScript. I learned how to organize a web project into different files and folders, design a responsive and attractive interface, and add interactive features using JavaScript.

I also learned how to test a website, identify errors, and make necessary corrections to improve its functionality and appearance. Another important learning outcome was understanding how to use Git and

GitHub to manage and publish a web project. I successfully uploaded my project to a GitHub repository and deployed it using GitHub Pages.

Overall, this lab improved my practical web development skills and gave me a better understanding of how a complete web project is developed, tested, corrected, and published online.

AI Assistance Declaration

I declare that AI tools, including ChatGPT, were used as an assisting tool during the preparation of this lab report and project. AI assistance was used for understanding concepts, improving explanations, identifying and correcting minor errors, and organizing the report. The final implementation, testing, and submission of the project were reviewed and completed by me.

AI Tool Used: ChatGPT

Purpose: Learning assistance, explanation, debugging support, and report organization.
